Happy Holidays!
from Brian at retrousb.com

There's nothing more emblematic of the Holiday seasons than the cozy feeling you get waking to a fire and conifer brimming under with presents. That feeling of togetherness and warmth and holiday spirit shared while singing songs of the season with friends and family. That feeling of turning Santa's Sleigh into a killing machine to use against three of your closest friends. Ah, such memories!

Each player is positioned in one of 4 corners and the game begins with a 3-second timed countdown. Once the timer expires, your goal is to shoot down the other biplanes without getting shot, or worse, plummeting into the ground. Each plane can maneuver in 360 degrees by using the d-pad and can fire by pressing the A BUTTON. The object of the game is to score the most points.

Colliding into the ground, the balloon tower, or bullets, will end your life, so maneuver with care! After you die, the scorebox will flash and you'll have a brief window of invulnerability where your plane will blink -- use this time wisely to get your planeoff the ground and into position to fight! Running off the top of the screen can also cause your plane to stall. But fear not, if you're a savvy enough pilot, you can recover from even the worst barrel-rolls!

D Pad: Move biplane in any direction
A: Fire button
Select: Cycle through music selections (main menu).
Start: Start the game (main menu) or reset the game (in-game).

Tips & Techniques:
- You can fly into the opposite side of the screen by exiting either side of the screen.
- Do not pilot your biplane vertically for too long because gravity will slow your down, eventually leading you to crash.
- Try to end the game before the weather changes or night falls. The clouds will begin to move more quickly, making it difficult to orient yourself. Once night fall sets in, it's harder to see the enemy bullets.
- Keep moving! The best technique is to never stay in any position for long.
